### RS-3500/RS-5400 Remote Sensing Bundle Include:
- RS-3500 and RS-5400 compact, portable spectroradiometers
- Ergonomically designed pistol grip with industry-standard Picatinny rail for mounting accessories, for example, a laser sight
- AC universal power supply
- DARWin SP Data Acquisition software
- Pelican case
- Padded backpack
- 5x5 inch reflectance standard (99%) with aluminum case, cover and tripod mount
- 1.5 meter metal clad fiber optic with SMA-905 input connector (includes thumbscrew release mount)
- NIST-traceable radiance calibration of 25 degree FOV fiber optic cable
- Rechargeable battery and universal AC charger
- Battery power cable
- Optional ALGIZ 8X handheld tablet running Windows 10, with a Bluetooth connection to DARWin LT and GPS—for RS-3500 and RS-5400 bundles

RS-3500 and RS-5400 Remote Sensing Bundles

Full range, portable, fiber optic spectroradiometers for remote sensing
Field Remote Sensing Systems to Match Your Application

SPECTRAL EVOLUTION's RS-3500 and RS-5400 spectroradiometer bundles are used in the field for a wide range of remote sensing applications, including:

- Ground truthing—confirming, disputing, or interpreting hyperspectral or multi-spectral data
- Environmental research
- Agricultural analysis
- Ecosystem change
- Forestry research, including canopy studies
- Glacial change and climate studies
- Atmospheric research
- Calibration transfer and satellite sensor validation
- Water body studies
- Plant species identification
- Urban development
- Crop health, including photosynthesis efficiency
- Irrigation assessment
- Soil analysis, including topsoil fertility and erosion risks
- Soil degradation, mapping, and monitoring
- Geological remote sensing, including surveying, mineral identification, and geomorphology

The RS-5400 provides high resolution/high sensitivity performance for remote sensing application with the following spectral resolution:

- 2.5nm @ 700nm
- 5.5nm @ 1500nm
- 8.8nm @ 2100nm

Both the RS-3500 and RS-5400 bundles offer many different styles of contact probes and fiber holders such as a pistol grip with unique low reflectance and impact resistant thermoplastic handle, pushbutton trigger for data collection, and industry-standard Picatinny rail for mounting accessories such as laser sights. A standard pistol grip with or without a Picatinny rail and triggering is also available. A sample contact probe with built-in light source is also available.

Fixed mount FOV lenses are available in different sizes, including 1, 2, 3, 4, 5, 8, and 10 degrees. We also offer a benchtop probe with sample holder and compactor for vegetation and soil measurements. For reflection and transmittance measurements of leaves and needles, we offer a portable 4 inch RT sphere.

A Field Instruments to Fit Your Research

The RS-3500 and RS-5400 Spectroradiometer Bundles

Our RS-3500 and RS-5400 bundles feature the spectroradiometers with NIST-traceable calibration for spectral radiance or irradiance measurements (depending on your optics choice) so you can get to work immediately. They are ideal for reflectance measurements in applications like vegetation studies, climate research, and soil analysis.

RS-3500 and RS-5400 Spectroradiometer Bundles Advantages

- Fast, full spectrum UV/VIS/NIR measurements (350-2500nm) with a single scan
- Autoshutter, autoexposure, and autodark correction before each new scan, with no optimization step, for one-touch operation
- Superior reliability—no moving optical parts to break down
- Lightweight and compact—RS-3500 weighs only 4kg/8.94lbs; the RS-5400 12.64lbs/5.73kg—small enough to carry on board a plane and around a field or forest
- Rechargeable Li-ion batteries are included and provide up to 8 hours of field use
- Removable fiber optic cable—field swappable
- Best in class sensitivity/NER (low noise equivalent radiance)
- Bluetooth connectivity (Class I)
- Optional rugged ALGIZ 8X handheld tablet running Windows 10, a sunlight readable display, GPS, built-in camera and Bluetooth communication and running DARWin LT
- DARWin SP Data Acquisition software for one-touch scanning, automatically saves data as ASCII files for use with 3rd party software (no post-processing), displays reflectance/transmittance data (percentage) or absorbance (logarithmic) versus wavelength, and produces single and multiple spectral plots

USGS Library & Vegetation Indices

Access to the USGS spectral library for vegetation and nineteen vegetation indices is provided by pull-down menu in DARWin SP Data Acquisition software. Vegetation indices include:

- NDVI (Normalized Difference Vegetation Index)
- SR (Simple Ratio Vegetation Index)
- SAVI (Soil Adjusted Vegetation Index)
- ARVI (Atmospherically Resistant Vegetation Index)
- EVI (Enhanced Vegetation Index)
- IPVI (Infrared Percentage Vegetation Index)
- PRI (Photochemical Reflectance Index)
- WBI (Water Band Index)
- PAR (Photosynthetically Active Radiation)
- GRVI (Green Ratio Vegetation Index)
